Version 1 features

1. Fridge Snap
2. Zero-Waste Recipe Builder
3. Substitution Finder
4. Basic Dietary and Allergy Settings
5. “Use Soon” Item Marking

Why each Version 1 feature is important

1. It’s the signature feature that sets EcoPlate apart from other recipe apps, and the app can’t deliver its promise without it.
2. It turns the detected ingredients into real, step-by-step meals, which is the payoff users came for.
3. It keeps users from giving up and buying groceries when they’re missing just one ingredient.
4. It keeps AI-generated recipes safe and relevant for people with common restrictions like nut-free, vegetarian, or gluten-free diets.
5. It lets users flag items that are about to go bad so the recipe builder uses them first, which supports the zero-waste goal without needing full date tracking.

Future features

1. Full Pantry Expiry Tracker with Alerts
2. Green Impact Dashboard
3. Advanced Dietary Filter Customization
4. Community Recipe Sharing
5. Smart Grocery List Integration
