App Concept Document: EcoPlate

1. App Name

EcoPlate

2. One-Sentence Elevator Pitch

EcoPlate is an AI-powered smart kitchen app that uses a quick photo of your leftover fridge or pantry items to invent delicious, zero-waste recipes using only what you already have.

3. Problem the App Solves

Food waste is a major issue at home and in school cafeterias, and students or busy teens often find themselves staring at random ingredients left in their fridge or pantry with no idea what to cook with them.

4. Target Users

- Teenagers who love to cook or want to learn basic kitchen skills.
- College-bound students practicing independent life skills and budgeting.
- Anyone wanting to reduce food waste, save money on groceries, and eat healthier.

5. Main Goal

To make cooking fun and accessible while reducing household food waste by turning random, leftover ingredients into creative, easy-to-make meals.

6. Five Key Features

- **Fridge Snap:** Take a quick photo of the inside of your fridge or pantry, and the app instantly detects which ingredients are available.
- **Zero-Waste Recipe Builder:** Generates step-by-step recipes ranked by how closely they match your current ingredients to prevent food from spoiling.
- **Substitution Finder:** Suggests clever ingredient swaps if you are missing something for a recipe (like using applesauce instead of butter in a pinch).
- **Pantry Expiry Tracker:** A digital log that alerts you when ingredients are close to expiring so you can use them up in time.
- **Green Impact Dashboard:** Simple statistics tracking how much food waste you've prevented and money you've saved over time.

7. Benefits for Users

- **Saves Money:** Cuts down on grocery expenses by helping you use up what you already own instead of buying extra ingredients.
- **Reduces Waste:** Keeps perfectly good food out of landfills by turning random leftovers into great meals.
- **Builds Cooking Confidence:** Teaches creative problem-solving in the kitchen and makes trying new recipes fun and stress-free.
- **Convenient & Fast:** Eliminates the "what's for dinner?" struggle with instant recipe ideas right from your phone.

8. Future Ideas for Improvement

- **Community Recipe Sharing:** Allowing friends and classmates to share their favorite custom zero-waste recipes and kitchen tips.
- **Dietary Filter Customization:** Adding filters to automatically adjust recipes for vegan, vegetarian, gluten-free, or allergy-friendly diets.
- **Smart Grocery List Integration:** Automatically adding missing core ingredients to a shopping list only when essential items run out.
